Facilities : Port Hedland & Dampier

WHO WE ARE

Quest Maritime Services (QMS) was established in Western Australia in 1997, as a provider of Support Vessels to the Oil and Gas industry.

Our Operations office is in Broome, with storage and boardroom facilities available to clients. We maintain an office in Darwin, with Head Office in Hillarys Marina, Perth.

Quest Maritime is an ISO 9001 Quality Management Certified and Woodside accredited company, with comprehensive Vessel Safety Management Systems in place. All our vessels are IMCA and OVID audited.

QMS has vessels available for charter from, but not limited to Broome, Dampier and Darwin, so as to provide comprehensive services to the entire Northwest WA and Northern Territory coasts.

Through our years of combined experience, we can offer highly skilled, qualified personnel to provide safe, efficient and effective outcomes. QMS takes pride in our ability to cater to all our client's specific requirements, while maintaining a strong focus on OH&S disciplines and procedures, which are paramount to this company's principles, addressing:

Health, Safety & Environment

Honest & Ethical Behaviour

Quality Management and Crew Training

COMPANY POLICY

To be recognised as a leading provider of charter vessels for specialised marine contract work, that is managed and operated in a safe, effective manner, with high regard for the welfare of crew, clients and the environment.

QMS PROVIDES CONSULTANCY SERVICES TO THE MARITIME INDUSTRY.

As a long time supplier of manned vessels to the marine sector of the resource industry, Quest has first hand experience, and an in depth understanding, of the requirement for Industry to instigate and maintain functioning Vessel Safety Management Systems by 2015/16, as per NSCV Part E Schedule 2.

We have experienced Maritime professionals working with an in house DNV qualified Integrated Management System Auditor, combining their expertise to create Vessel Safety Management Systems, educate relevant crews in the workings of the document, and provide an annual auditing/ monitoring service to maintain compliance.

Our services include:

- Determining and writing the required operational procedures appropriate to your vessel and type of operation.
- Identifying and creating the required Risk Analysis matrices.
- Determining and writing the Emergency Drills required to be carried out and recorded on a regular basis.
- Creating a system for recording and closing out Hazardous Occurrences.
- Creating Crew Training and Induction Manuals
- Assist in the required annual review of the SMS by Master and Owner

We also offer Management services with regard to certification and compliance to:

- Quality Management System ISO 9001:2008
- Environmental Management System ISO 14001:2004
- OHSAS Management System ISO 18001:2007

Our Objectives

- Continually improve your business by introducing a Management System
- Help with the frustration of continually firefighting respective regulatory requirements
- Improve your businesses efficiency and productivity by reducing waste and reworking costs
- Improve communications, training and job satisfaction within your company
- Provide you with the tools to enhance customer satisfaction

Our Services

- Workplace Assessments
- Complete Management System's policies, procedures and manuals
- Complete Vessel Safety Management Systems
- Workplace Training
- Workplace Emergency Response Training and Evacuation drills
- Assistance with Certification
- Hazard and Risk Analysis
- Induction Programmes
- Safety Inspections and Program's
