

ENVIRONMENTAL POLICY

Quest Maritime services is an environmentally responsible operator. It is our policy to maintain a healthy and ecologically sustainable environment. We are committed to the prevention of pollution, reduction of waste and improvement of re-cycling both on board company vessels and within administration.

Our policy will apply the following guiding principles:

Recognise environmental management as being a high priority, establishing practices to ensure that all our activities are conducted in an environmentally sound manner and together with safety, combining these practices as an essential element of management in all out business.

Educate, train and encourage all staff to conduct their activities in an environmentally responsible manner and minimise the use of raw materials, toxic substances, energy, water and other resources.

Continue to improve our environmental practices, taking into account current legislation, governmental policy, and industry codes of practice, technical developments and expectations of the community.

Access environmental impacts and develop and implement appropriate strategies prior excursions, before starting a new activity or project and before leaving a site.

Review our purchasing practices and adopt environmentally friendly purchasing practices where practicable.

Promote the adoption of our principles to our personnel where appropriate.

Promote good public relations by participating with other stake holders, anticipating and responding to their concerns about potential environmental impacts arising from our activities.

Comply with the ISO 14001:2004 Standards and gain accreditation.

RESPONSIBILITIES

Responsibility for developing and implementing Quest Maritime Services' environmental policies lies with the Directors.

Responsibility for application of this policy rests with *all* Quest Maritime Services' employees.
