

QUALITY ASSURANCE POLICY

It is the policy of Quest Maritime Services to maintain an efficient and effective working environment by implementing and using good management systems and processes. These are focused on enhancing our ability to maintain high standards of safety and environmental management, and thereby adding value for our clients. This policy promotes the idea that all employees are responsible for:

- Achieving excellence in understanding and meeting the requirements of our clients
- Continually improving business standards and efficiencies
- Continuous improvements in operational competence through feedback.
- Comply with ISO 9001:2008 and obtain certification

These goals will be achieved by:

- Striving for a consistent, planned approach to our routine work systems, processes, and procedures
- Nominating owners of documents who are responsible for their maintenance
- Performing ongoing audits, corrective actions and reviews to improve
- Reviewing our quality objectives on a continuous basis

The attendant controlled method of procedures and working documents, e.g. manuals, drawings, etc. are provided to give assurance that by their use a consistent approach and a reliable work environment for all personnel is maintained.

This Policy has been reviewed and endorsed by the management of QMS who foresee benefits in, and take responsibility for, its successful implementation.

By accepting employment with the Company, each employee accepts that they are responsible for the application of this policy.
