

WASTE MANAGEMENT POLICY

Quest Maritime Services is firmly committed to the reduction and treatment of waste and encouragement of recycling onboard.

All personnel travelling on Quest Maritime Services vessels are encouraged to re-cycle wherever possible. This will be communicated both verbally by marine staff, and formally through the use of signage on the vessels so that all persons are aware of company policies.

All sewage, grey water and other biodegradable garbage shall be stored on vessels until such time it can be disposed of in accordance with **MARPOL 73/78** convention, Annex IV regulations and or **Marine** license conditions.

All waste from Quest Maritime Services vessels, offices, sheds and other ancillary facilities shall be disposed of ethically and legally, complying with all maritime and shire laws, legislations and guidelines.
